

SPIRITED DESIGNS NEWS

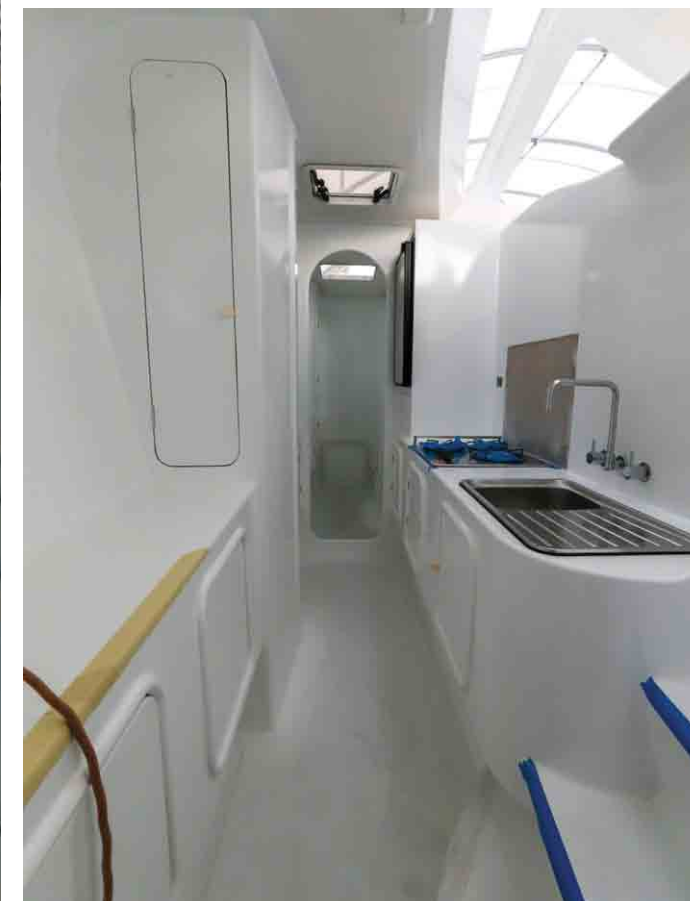

There have been plenty of exciting projects coming through in the last few months.

Spirited 480 *Roam* in Tasmania with stunning paint job!

Spirited 480 *Roam* internally. Port side queen sized island berth.

Galley in port hull.

The racing carbon fibre mast and boom custom designed for a Spirited 380 is also nearing completion. Both the mast and boom will be finished in clear carbon with state of the art technology. A recent Spirited 480 kit order to Victoria is underway as well as news of Mick Hoult's Spirited 480 which has just been painted and nearing completion.

Also in Victoria one of our power-sail 8.5m Stow-Away designs is being built using plastic welded polyethylene. We are also well into a custom 4.2m Ripple tender re-designed to suit wheelchair access. This boat is fully decked with a custom door through the hull topsides.

We also recently got news from one of our Spirited 230 builders in Turkey who is getting close to painting. We had two Spirited 230's launched late last year and both were very well finished. This design is a popular choice for those wanting a compact trailerable powercat.

The Ripple tenders have also been extremely popular with good kit and plan sales. Some may remember the 3.2m Ripple tender we built for a European client last year which is due to land in Italy any day now (at time of writing). We are looking forward to a busy 2015.

above left: 3.2m Ripple tender being crated for its long journey to Switzerland.

left: Boxed up ready for pick-up. Because the crate was going to be loaded into a container it needed to be built with end lifting in mind.

Spirited 230 built in Brisbane. This boat will be used as a personal ferry to Moreton Island for the owners.

Spirited 230 *Sea Dog*. Launched in Gosford NSW.
